

# HttpClient

#### El FSE invierte en tu futuro

### Solicitud de respuesta

config.ts

```
export interface Config {
   heroesUrl: string;
   textfile: string;
}
```

config.service.ts

```
getConfig() {
  // now returns an Observable of Config
  return this.http.get<Config>(this.configUrl);
}
```

config.component.ts

```
config: Config;
showConfig() {
  this.configService.getConfig()
    // clone the data object, using its known Config shape
    .subscribe((data: Config) => this.config = { ...data });
}
```

#### El FSE invierte en tu futuro

### Respuesta completa

```
getConfigResponse():
  Observable<HttpResponse<Config>> {
    return this.http.get<Config>(
        this.configUrl, { observe: 'response' });
}
```

#### El FSE invierte en tu futuro

### Peticiones no JSON

```
getTextFile(filename: string) {
    // The Observable returned by get() is of type Observable<string>
    // because a text response was specified.
    // There's no need to pass a <string> type parameter to get().
    return this.http.get(filename, {responseType: 'text'})
    .pipe(
        tap( // Log the result or error
        data => this.log(filename, data),
        error => this.logError(filename, error)
    )
    );
}
```
